

Chamidu Prabodya

Undergraduate Student | SLIIT

Motivated undergraduate specializing in Information Technology, with a strong foundation in software development, networking, databases, and IT systems. Skilled in analytical problem-solving, troubleshooting, and optimizing processes through technology. Known for strong teamwork, attention to detail, and the ability to learn quickly in fast-paced environments. Seeking opportunities to apply academic knowledge to real-world IT challenges and contribute to efficient, innovative, and reliable technical solutions.

Expertise

- Frontend Development
- Backend Development
- Project Management
- UI/UX

Skills

- Java
- JavaScript
- react
- go lang
- node js
- mongodb

Language

- English
- Sinhala

Education

○ 2024 - Present

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology (SLIIT)

Currently pursuing an honors degree in Information Technology, focusing on key areas such as software development, networking, database management, cloud computing, and IT systems analysis. Developing strong analytical and problem-solving skills through coursework, practical labs, and real-world IT projects. Actively building knowledge in modern technologies, system optimization, and end-to-end digital solutions to enhance efficiency, security, and performance..

○ 2020

The Short Course In English

University Of Colombo

The course focused on developing practical communication skills, grammar, writing, and spoken English for academic and professional settings.

Experience

○ 2026 -Team Leader

Web Application Development Project (Academic)

RESTA Fast Food is a responsive food ordering web application developed as a team project. As the Team Leader, coordinated development activities, supported team members, and ensured the project progressed according to planned milestones. Contributed to creating an attractive and easy-to-use interface that allows customers to browse food items and interact with the ordering system smoothly. The project provided practical experience in web application development, teamwork, leadership, UI/UX design, and project coordination.

○ 2025 -Team Leader

Web Application Development Project (Academic)

Led a team in developing a web application for a construction company as part of an academic project assigned by the university. The project focused on solving a simulated industry problem designed by the campus. Responsible for planning the project, gathering requirements, assigning tasks, and overseeing both design and development stages. Guided the team in creating user-friendly interfaces and implementing key features such as project tracking, material management, employee handling, and workflow monitoring. Worked closely with lecturers for feedback, ensured milestone completion, and maintained proper project documentation. Gained valuable experience in team leadership, software development processes, and delivering structured academic IT solutions

Additional Skills

- **video editinhg**
- **video graphy**
- **Content Creation**

○ **2025 -Team Leader**

mobile Application Development Project (Academic)

Led a team in developing a food restaurant mobile application as part of a university academic project. Managed project planning, requirement gathering, task allocation, UI/UX design, and development activities. Guided the implementation of key features including menu browsing, food ordering, cart management, order tracking, customer management, and payment handling. Coordinated with lecturers for feedback, ensured timely milestone completion, and maintained project documentation. Strengthened skills in team leadership, mobile app development, project management, and software development processes.

○ **2024 -Team Leader**

IOT Project (Academic)

Led a team in developing an automated medication delivery trolley for healthcare facilities. Managed project planning, task allocation, team coordination, and development activities. The system used Arduino, line-following sensors, ultrasonic obstacle detection, and Bluetooth connectivity to navigate predefined paths and support scheduled medication delivery through a mobile application. Strengthened skills in team leadership, embedded systems, IoT, automation, and mobile app integration.
